EXPERIENCE

INHR

Washington, D.C.

AI Policy Research Fellow

January 2026 – Present

- Conduct policy research on AI governance frameworks and AI risk mitigation frameworks, focusing on responsible AI use in military and national security contexts
- Analyze governance mechanisms, compliance structures, and monitoring models for AI deployment
- Present research to senior leadership, policy coalitions, and external partners, in support of campaigns concerning the secure and accountable use of artificial intelligence tools in military contexts

CLEAR

New York City, NY

Senior Software Engineer

March 2021 – September 2025

- Led a team of engineers to develop authentication features for CLEAR's online identity verification platform
- Joined CLEAR as a Software Engineer I. Promoted to Software Engineer II and Senior Software Engineer over the course of several years of consistent high quality feature delivery and leadership
- Authored technical documentation translating regulatory and trust requirements into system design
- Developed data analytics pipelines supporting compliance, auditability, and data governance requirements
- Founded and captained the CLEAR corporate soccer team

Scoop

New York City, NY

Technical Cofounder

May 2020 – March 2021

- Cofounded a startup developing a reverse logistics solution for e-commerce returns
- Developed and managed all technical aspects of the product from concept to launch with 4 customer properties
- Designed and implemented secure end-to-end solutions for web platform authentication, database tooling, and hardware access management

ENEL X

Boston, MA

Software Engineer I

July 2016 – March 2018

- Developed API services for managing user sessions and authorization roles for the Enernoc Security team
- Promoted from Junior Engineer to Software Engineer I for consistent code contribution and initiative

Civic Work

**Tech Action NYC
Committee Leader**

**New York City, NY
January 2023 – December 2024**

- Served on the Organizing Committee for Tech Action NYC, a civic group that organizes political action around technology issues in New York City and New York State
- 1 of 4 Organizing Committee members managing an active group membership of 100
- Created the group's 2023 charter for an Artificial Intelligence Justice Initiative which involved collaboration with New York State Senator Kristen Gonzalez to build momentum around her artificial intelligence bill, S7543
- Ran bi-weekly meetings, coordinated group actions and organized guest speakers for political education groups
